ISO 2550 - 1972

Textile Floor Coverings - Hand-made Carpets - Determination of Types of Knots

1 SCOPE AND FIELD OF APPLICATION

This reference has a procedure for determining the type of knot made by fingers or hook to construct a hand-made carpet. This may aid in evaluating carpet commodities classifiable in Section XI, Chapter 57 of the Harmonized Tariff Schedule of the United States (HTSUS). This reference is being provided as general guidance and should not be considered exhaustive. Consult the current editions of the Explanatory Notes to the Harmonized Commodity Description and Coding System and the Harmonized Tariff Schedule of the United States, and such U. S. Customs Laboratory methods for the HTSUS Chapters of 58 (on such constructions as pile and tufted construction, lace) which could be helpful.
